

**SACVALLEY
MEDSHARE**

IN THE DRIVER'S SEAT

At The Intersection of Improving Your Health
and Your Health Care Data

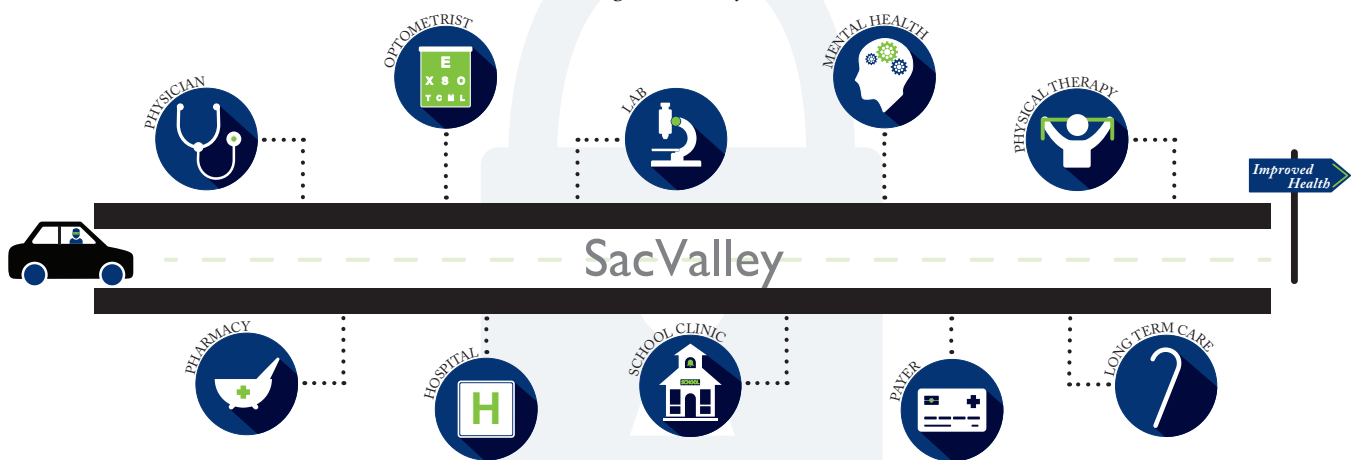

Why participate in SacValley MedShare?

When it comes to your healthcare data and allowing providers to securely access your information to improve your health outcomes, you are in the driver's seat. Participating physicians, hospitals, and other healthcare-related entities, who all play a part in caring for you, may share your current health information through a secure, electronic health information network. Your participating healthcare providers will have access to your full patient record to include diagnosis, treatment, lab results, medications, etc., in an effort to deliver you the most efficient and thorough services possible.

A patient may at any time decide to opt-out from having health records shared through the health information network. For more information visit www.sacvalleyms.org.

IN THE DRIVER'S SEAT

Taking the SacValley Route

The information that is shared through the secure network may include health information related to treatment from all participating healthcare providers who are connected to the network, providing the most complete patient record available. This may include information about your diagnoses, procedures, allergies, test results such as x-rays or laboratory, and prescribed medications. Such information may

include sensitive health information ("Sensitive Information", i.e., mental health information, HIV/AIDS, genetic information and test results, alcohol and drug abuse treatment information other than alcohol and drug abuse treatment information subject to 42 C.F.R. Part 2, and, developmental disability treatment.) A list of healthcare providers who participate can be found at www.sacvalleyms.org.

SacValley is a member of the
KONZA national network.
